

January 2010 - Dimension One Spas received the SpaRetailer Trade Certified™ status for manufacturing in 2010. The SpaRetailer Trade Certified status is a new award that means that D1 was selected as one of the best manufacturers in North America based on an independent audit related to sales, service, operations, and **dealer network satisfaction**.

Dimension One Spas is one of only two spa manufacturers who received this award so far for 2010. Spasearch Magazine recognized Dimension One Spas with the Spasearch Certified™ award, for being a hot tub manufacturer that consistently provides a superior buying experience for **new hot tub owners** based on an audited customer satisfaction survey. This recognition means that D1 was selected as one of the most reputable businesses in North America based on an independent consumer audit designed to measure a homeowner's overall service satisfaction.

The Spasearch Certified and SpaRetailer Trade Certified endorsements were created as a way to recognize the best customer-oriented portable hot tub manufacturers that consistently provide a superior experience for new hot tub owners, dealers, even the vendors they work with. Completely independent, these coveted awards are only presented to manufacturers who demonstrate excellence on every level. This impartiality and the demanding nature of the award criteria make these accolades the first of their kind in the portable hot tub industry.

Dimension One Spas is the ONLY company that has been recognized every year since the beginning of the Spasearch Certified and SpaRetailer Trade Certified programs.
